

Color Card

FILASA offers its customers a yarn dyeing service, based on the best standards and quality, with a capacity of about 360Ton/month, offering various capacities to respond to all customer needs.

FILASA's production capacity is between 3 and 900KG.

This catalogue showcases the colour palette developed by our dyehouse, designed to offer versatility, chromatic depth, and excellence in application. Each shade has been carefully tested to ensure consistency, fastness, and technical performance across different fibres and production requirements.
